*Rearrange Formulas and Equations*

**Think Clever!**

Area of a rectangle  
Solve for w

$$\frac{A}{l} = w$$

$$\frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} = \boxed{\phantom{00}}$$

Area of a triangle

Solve for h

$$\boxed{\phantom{00}} A = \frac{1}{2} b h \boxed{\phantom{00}}$$

$$\boxed{\phantom{00}} \boxed{\phantom{00}} = \boxed{\phantom{00}} \boxed{\phantom{00}}$$

$$\boxed{\phantom{00}} - \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$\frac{\boxed{\phantom{00}} \boxed{\phantom{00}}}{\boxed{\phantom{00}}} = \boxed{\phantom{00}}$$

Solve for w

$$P = 2v + w$$

$$\boxed{\phantom{00}} - \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

Solve for y.

$$3y + 4x = 9$$

$$\boxed{\phantom{00}} - \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$\boxed{\phantom{00}} = \boxed{\phantom{00}} - \boxed{\phantom{00}}$$

$$\boxed{\phantom{00}} = \frac{\boxed{\phantom{00}} - \boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$
